Secure Temp® S2100

APPLICATIONS

The Secure Temp S2100 has been designed to widely exceed existing safety standards while offering the best available chimney system. It has been designed for use with wood, gas, oil, or coal-burning appliances. The Secure Temp S2100 high-temperature chimney is certified by Intertek Testing Services (Warnock Hersey) to ULC S629 standards for diameters of 6, 7 and 8 inches.

A TRADITION OF EXCELLENCE

For over 50 years, Security Chimneys has been an innovator in the venting field and a market leader in North America. Instrumental in the company's growth has been an ongoing focus on product improvement and the introduction of new, innovative products. This drive for excellence has given rise to the Secure Temp S2100, one of the most popular lines of venting products in North America. These high-quality products ensure that end-users benefit from maximum safety and proven corrosion protection.

INNOVATIVE COMPOSITION AND EASE OF INSTALLATION

The use of stainless steel, selected for its resistance to high temperatures and corrosion, lends outstanding durability to the Secure Temp S2100 high-temperature chimneys. Secure Temp S2100 has a temperature rating of 650°C (1200°F); max. continuous, 760°C (1400°F) brief forced fired; and 1150°C (2100°F) 3 x 30 minutes, tested.

All chimneys feature 2 inches (S2100) of superior-quality, high-density Secura Plus insulation. This exclusive insulation keeps the temperature of the outer casing relatively low, keeping safety features as simple as possible. The S2100, with 2 inches of insulation, is well-suited for outside installations in areas where very cold temperatures occur.

All Secure Temp S2100 high-temperature chimneys, regardless of diameter, can be installed as close as 2 inches from combustible materials.

The S2100 also features fast and easy Twist-Lock assembly. Lengths and universal fittings fit together and lock into place by twisting one-eighth of a turn. No other part is needed to ensure the chimney's structural stability, keeping installation time to a minimum.

SECURITY CHIMNEYS

SECURE TEMP 2100

CHIMNEYS FOR WOOD STOVE APPLICATIONS

Features	Benefits
Twist-Lock stainless steel coupler system with 1-inch overlap	<ul style="list-style-type: none"> • No screws or other attachments required • Fast and easy installation with one-eighth of a turn
Stainless steel inner lining	<ul style="list-style-type: none"> • Provides smoother surface • Little restriction of flue gases even with an elbow • Outstanding corrosion resistance
Two inches (S2100) of exclusive Secura Plus insulation	<ul style="list-style-type: none"> • No shifting of the insulation • Keeps cooling of gas temperatures minimal which stabilizes at high temperatures • Reduces condensation and creosote buildup • Increases appliance performance by providing stable draft • Low surface temperature • Minimum 2-inch safety clearance to combustible materials in all diameters
Fast venting of combustion products	<ul style="list-style-type: none"> • Delivers a stable and powerful draft
Stainless steel outer casing	<ul style="list-style-type: none"> • Supports the structural load • Corrosion resistance
Inner liner attached only to the male coupler	<ul style="list-style-type: none"> • Free-floating inner wall means no need for expansion joints • Unhindered expansion with rising temperatures
Lightweight - 6-inch diameter, 8.9lb per linear foot	<ul style="list-style-type: none"> • Delivers a more user-friendly design • For support, see "Loadbearing Capacity" chart on page 4.

INSTALLATION KEY

- 1 Black Stove Pipe
- 2 Finishing Cone
- 3 Insulated Wall Thimble
- 4 Tee Support
- 5 Insulated Tee
- 6 Insulated Length
- 7 Universal Wall Band
- 8 Insulated Attic Radiation Shield
- 9 Adjustable Roof Flashing w/ Storm Collar
- 10 Rain Cap
- 11 Firestop
- 12 Finishing Support
- 13 Anchor Plate

Exterior installation to a wood stove.

Offset and rise calculation

The following steps will help determine the lengths required for an installation:

1. Determine the offset required in view of the obstacles that must be avoided.
2. Refer to the "Offset/Rise Chart" to determine the elbows required as well as the insulated lengths needed.
3. Check the corresponding offset height dimensions.

ELBOW OFFSET & RISE CHART

One length between elbows								
Angle	Dia.		8"	12"	18"	24"	36"	48"

Interior installation on a wood stove using a finishing support.

Chimney installed on a masonry fireplace.

Installation

Assembly always requires the male coupler to be positioned upwards. Size the chimney in accordance with the appliance instruction manual. Map out the chimney path closest to the heating unit. Prior to installation, consult the detailed installation manual included with the support components.

Any fireplaces and controlled combustion units can be connected to the Secure Temp S2100, since it has been certified, independently, to ULC S629M standards.

SAFETY

Security Chimneys Secure Temp S2100 chimneys can be installed as close as 2 inches to combustible materials, regardless of the diameter to be used. Radiation shields and appropriate supports must be used to maintain a safe clearance as the chimney passes through floors and combustible partitions.

Secure Temp® ASHT

APPLICATIONS

The Secure Temp ASHT is one of the most extensively used factory-built venting systems in North America. It has been specially developed for use with oil and gas burning heating appliances and certified wood-burning fireplaces. The Secure Temp ASHT high-temperature chimney is certified by Intertek Testing (Warnock Hersey) to ULC S604 standards and ULC S610 (on wood-burning fireplaces) for all diameters of 5, 6, 7, 8 and 10 inches.

CERTIFICATION

The Secure Temp ASHT high-temperature chimney is certified by Intertek Testing (Warnock Hersey) to:

- ULC S604 standards for all diameters of 5, 6, 7, 8, and 10 inches.
- ULC S610 (on wood-burning fireplaces) for all diameters of 5, 6, 7, 8 and 10 inches.
- ULC S629 for wood stove applications in diameters of 6, 7, and 8 inches.

INSTALLATION

Assembly always requires the male coupler to be positioned upwards. Size the chimney in accordance with the appliance instruction manual. Map out the chimney path closest to the heating unit.

For wood stove applications, a third pipe (premium shield) is required for inside installation where the chimney is enclosed between two floors (see premium shield accessories section). Prior to installation, consult the detailed installation manual included with the support components.

SAFETY

Security Chimneys's Secure Temp ASHT chimneys can be installed as close as 2 inches to combustible materials, regardless of the diameter to be used. Radiation shields and appropriate supports must be used to maintain a safe clearance as the chimney passes through floors and combustible partitions.

Some radiation shields in the Secure Temp ASHT line have been designed specifically for use with wood-burning fireplaces. For the use of Secure Temp ASHT with manufactured wood fireplaces, refer to the instruction of these products.

Kits

Wall Support Kit for 6" & 7" Diameters

Kit includes: Insulated tee, twist lock tee cap, adjustable tee support, insulated wall radiation shield, flue extension, double wall decorative collar, wall band, and rain cap.

Can use for through the wall installations.

Pipe not included.

ASHT

Ref. 6WSK, 7WSK

Only available in 6" & 7" Diameters.

S2100

Ref. 6XWSK, 7XWSK

Only available in 6" & 7" Diameters.

Exterior Kit for 6" & 7" Diameters

Kit includes: Insulated tee with insulated tee cap, adjustable tee support, insulated wall thimble, decorative collar single wall, flue extension, and decorative collar double wall, spark arrestor, rain cap, and wall band.

ASHT

Ref. 6EK-2, 7EK

Only available in 6" & 7" Diameters.

S2100

Ref. 6XKE, 7XKE

Only available in 6" & 7" Diameters.

Kits

Interior Kit

Kit includes:

Finishing support with coupler, 2 piece attic insulation shield, and rain cap.

Use for interior installations only.

ASHT

Ref. 6IK-1

Only available in 6" Diameter.

S2100

Ref. 6XKI, 7XKI

Only available in 6" Diameter.

Interior New Construction Kit

Kit includes:

Finishing support with removable outer trim collar, adjustable insulated attic radiation shield, and rain cap.

Use for new home construction with through the roof installation.

ASHT

Ref. 6IKNC

Only available in 6" Diameter.

Lengths

Insulated Lengths

ASHT: Five diameters and six standard effective lengths featuring a 1/8-turn Twist-Lock assembly.

S2100: Three diameters and six standard effective lengths featuring a 1/8-turn Twist-Lock assembly.

Various lengths may be combined to obtain the required installation height.

Adjustable Lengths

Used in combination with straight insulated lengths, the adjustable length makes it possible to fit a Secure Temp length perfectly. **IMPORTANT:** The adjustable length is not designed as a loadbearing component. Its vertical installation requires an appropriate support on the section above it to bear the weight of the remaining installation.

Tees

Base Tee

Located at the base of the chimney, it makes it possible to connect the chimney to a gas- or oil-burning appliance. It is recommended for interior installations only and must be attached to a flue extension. The galvanized steel base tee comes complete with a tee cap to provide access for inspection and cleaning. Available in stainless (TBS).

E	8"	9"	10"	12"

Insulated Tee

Located at the base of the chimney, it provides the horizontal connection to the appliance. It is recommended for installations where a connector must pass through an exterior wall because its insulation prevents the cooling of chimney gases. An insulated tee cap (TCS) is included, which allows easy access for maintenance and inspection.

The insulated tee cap (TCS) must be secured to the flue extension of the tee support or adjustable tee support.

Tees

Insulated Tee Cap (Twist-Lock)

Equipped with a Twist-Lock system, it makes it possible to seal the base of an insulated tee when an adjustable wall support (SME or XSME) is used. It can be removed, providing easy access for chimney maintenance and inspection. Its insulation prevents the cooling of chimney gases, especially in exterior installations.

Supports

Finishing Support

This part supports the chimney from a ceiling. Designed to connect to both double-wall and single-wall stove pipe, it is enhanced by a decorative black finish. Fits between standard 16"-on-center joists. Must be attached to a frame built from the joists. (Refer to chart on pg. 4 or 8 for loadbearing capacity and size of openings.) A finishing support is also available with a removable collar for 5" (5SFCA and 6" (6SFCA) installations.

Universal Roof Support

This complementary support is usually attached to a roof structure. It is designed to support the chimney:

- from the roof, adjusting to any roof pitch
- above an offset
- when the chimney height exceeds the loadbearing capacity of the primary support.

Two adjustable plates screwed to the structure adapt to the pitch of the roof. A tightening collar is attached and locks around the chimney. It is secured by self-tapping screws. (Refer to the chart on pg. 4 or 8 for loadbearing capacity.)

Supports

Floor Support

Used mainly from a basement, this part supports the chimney on a slab, floor, or joist and also acts as a firestop. It makes it possible to maintain a 2" clearance between the chimney's outer casing and combustible materials in its path. It includes a tightening collar that locks around the chimney and is secure by self-tapping screws (included). The collar rests on a horizontal plate screwed or nailed to the floor or slab. It can also serve as an intermediate support. (Refer to the chart on pg. 4 or 8 for load-bearing capacity.)

Limited Lifetime Warranty

This Security Chimneys International, Ltd. (SCIL) Limited Lifetime Warranty warrants your residential vent and/or chimney system to be free from defects in material and workmanship at the time of manufacture. This Limited Lifetime Warranty includes all components and fittings, except termination caps and Secure Black SW single wall black stove pipe. After installation, if covered components manufactured by SCIL are found to be defective in materials or workmanship during the Limited Lifetime Warranty period and while the Product remains at the site of the original installation, SCIL will, at its option, replace the covered components. SCIL reserves the right to replace covered components with an equivalent product and the replacement must be carried out in accordance with SCIL's recommendations. If replacement is not commercially practical, SCIL will, at its option, refund the purchase price or wholesale price of the SCIL product, whichever is applicable. THERE ARE EXCLUSIONS AND LIMITATIONS to this Limited Lifetime Warranty as described herein.

COVERAGE COMMENCEMENT DATE

Warranty coverage begins on the date of installation. In the case of new home construction, warranty coverage begins on the date of first occupancy of the dwelling or six months after the sale of the Product by an independent SCIL dealer/distributor, whichever occurs earlier. The warranty shall commence no later than 24 months following the date of product shipment from SCIL, regardless of the installation or occupancy date.

EXCLUSIONS AND LIMITATIONS

This Limited Lifetime Warranty applies only if the Product is installed in the United States or Canada and only if used for the application for which it was designed and intended. The Product must be maintained in accordance with the printed instructions accompanying the Product and in compliance with all applicable installation and building codes and good trade practices.

This warranty is transferable. The Product must be purchased through a listed supplier of SCIL and proof of purchase must be provided. SCIL will be responsible for the replacement of the residential vent and/or chimney system considered to be defective for the following periods:

Termination Caps & Secure Black SW Stove Pipe – Replacement at no charge for 5 years from the date of installation, excluding labor

Components and fittings (excludes termination caps and Secure Black SW) –

Year 1-15 – Replacement of all components and fittings (a labor allowance may apply to a maximum of 300 \$ * certain conditions apply).

Year 16 – Replacement at 50% off of the prevailing list price in effect at the time of replacement (No labor allowance applies).

*Labor Allowance Conditions: Any Warranty replacement work must be performed by a Professional Installer.

SCIL will not be responsible for: (a) damages caused by normal wear and tear, corrosion from salt air, accident, riot, fire, flood or acts of God; (b) damages caused by abuse, negligence, misuse, or unauthorized alteration or repair of the Product affecting its stability or performance. (The Product must be subject to normal use with approved fuels listed in the Operation Manual provided with the product. Where applicable, fuel products with abnormal burning characteristics, including but not limited to fuel such as driftwood, plywood and wood products using a binder may burn at excessive temperatures and may cause damage to the Product or may cause it to function improperly; (c) damages caused by failing to provide proper maintenance and service in accordance with the instructions provided with the Product; (d) damages, repairs or inefficiency resulting from faulty installation or application of the Product.

This Limited Lifetime Warranty covers only parts as provided herein. SCIL's entire liability is limited to the purchase price of this product. In no case shall SCIL be responsible for materials, components or construction which are not manufactured or supplied by SCIL or for the labor necessary to install, repair or remove such materials, components or construction. Additional utility bills incurred due to any malfunction or defect in equipment are not covered by this Limited Lifetime Warranty. All replacement or repair components will be shipped F.O.B. from the nearest stocking SCIL factory.

LIMITATION ON LIABILITY

It is expressly agreed and understood that SCIL's sole obligation and the purchaser's exclusive remedy under this warranty, under any other warranty, expressed or implied, or in contract, tort or otherwise, shall be limited to replacement, repair, or refund, as specified herein.

In no event shall SCIL be liable for any incidental or consequential damages caused by defects in the Product, whether such damage occurs or is discovered before or after replacement or repair, and whether such damage is caused by SCIL's negligence. SCIL has not made and does not make any representation or warranty of fitness for a particular use or purpose, and there is no implied condition of fitness for a particular use or purpose. SCIL makes no expressed warranties except as stated in this Limited Lifetime Warranty. The duration of any implied warranty is limited to the duration of this expressed warranty.

No one is authorized to change this Limited Lifetime Warranty or to create for SCIL any other obligation or liability in connection with the Product. Some states and provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. The provisions of this Limited Lifetime Warranty are in addition to and not a modification of or subtraction from any statutory warranties and other rights and remedies provided by law.

INVESTIGATION OF CLAIMS AGAINST WARRANTY

SCIL reserves the right to investigate any and all claims against this Limited Lifetime Warranty and to decide, in its sole discretion, upon the method of settlement.

To receive the benefits and advantages described in this Limited Lifetime Warranty, the appliance must be installed and repaired by a licensed contractor approved by SCIL. Contact SCIL at the address provided herein to obtain a listing of approved dealers/distributors. SCIL shall in no event be responsible for any warranty work done by a contractor that is not approved without first obtaining SCIL's prior written consent.

HOW TO REGISTER A CLAIM AGAINST WARRANTY

In order for any claim under this warranty to be valid, you must contact the SCIL dealer/distributor from which you purchased the product. If you cannot locate the dealer/distributor, then you must notify SCIL in writing. SCIL must be notified of the claimed defect in writing within 90 days of the date of failure. Notices should be directed to the SCIL Warranty Department at 2125 Monterey, Laval, Quebec, Canada H7L 3T6.
