SECURITY CHIMNEYS SECURE SEAL SINGLE & DOUBLE WALL SPECIAL GAS VENT

Secure Seal® SS, SSD, SSID, & Flex

Secure Seal features a smooth weld seam inside and out, which is completely shielded during the welding process. Contamination or molecular changes in the weld seam are avoided and no fillers are used in the welding process. The Secure Seal double-wall system is fully interchangeable with our Secure Seal single-wall system. Both have been conformed to UL1738 and certified to ULC-S636 safety standards. When installed according to Security Chimneys' installation instructions, Secure Seal meets all test requirements for horizontal and vertical, interior or exterior installations. SSID features the same construction as SSD, but with 2" air space filled with mineral wool insulation.

Features	Benefits
Laser welding	<ul style="list-style-type: none"> Reinforces strength Prevents leakage Increases durability and reliability
Built-in Secure Lock system	<ul style="list-style-type: none"> Provides quick and easy assembly and disassembly Requires less time on the job site
